

## **DOLE 12 Advocates Gender and Development Program through GAD-OLYMPICS**

Promoting gender and development is one of the programs undertaken by the department as unity and opportunities are shared by both men and women towards economic and human development.

To advocate the program, DOLE 12 conducted the GADLYMPICS on September 19 – 20, 2018 with the theme "Harmonizing Multi-Generational Workforce towards an Empowered DOLE 12 Family". This activity aimed to understand the personality and wholeness of each DOLE 12 human workforce to better understand each other uniqueness and individuality for a more harmonious working environment. Further, it intends to promote respect in each other's diversity and differences to maintain a professional working relationship.

At the end of the activity, everybody was able to discover generation behaviors and temperaments. The staff came to know each other deeper and understands each other's own differences. Further, the knowledge and learning will be used towards increased productivity in the implementation of the programs, projects and services towards the attainment of the agency's goals.
